Introducing Civitanavi Systems' inertial systems

Our Vision: Civitanavi Systems' vision is to be the technology powerhouse for inertial stabilisation and navigation solutions, enabling the future of mobility

Navigation
relative position and orientation

Stabilisation
automatic stabilisation for safety and function

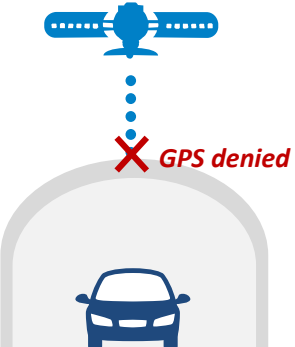

Multiplatform-friendly
appropriate for aerospace & defense or industrial purposes

Why GPS simply isn't enough

Navigation and positioning reliability

GPS⁽¹⁾

Relies on a clear signal from a satellite to establish navigation and position

INS

Does not require external sensors and provides uninterrupted navigation

Stabilisation under harsh environments

GPS

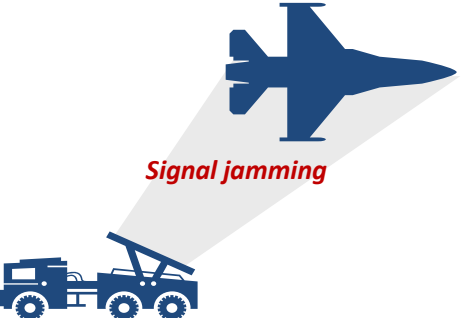

Cannot produce any gyro data to offer automatic stabilisation of vehicle

INS

Automatic stabilisation for efficient functioning of antennas and equipment

Immune to jamming / spoofing

GPS

GNSS equipment are highly prone to jamming and/or spoofing

INS

Resistance to jamming and spoofing allows stable navigation and positioning

Civitanavi Systems continuing a profitable growth since inception

PRESS RELEASE

CIVITANAVI SYSTEMS INVESTS IN PV-LABS AND INCREASES THE TECHNOLOGICAL KNOW-HOW IN ADVANCED IMAGING SYSTEMS

Pedaso (FM), & Burlington (ON), January 30 2023 – Civitanavi Systems S.p.A. (EURONEXT MILAN, CNS) leading Italian manufacturers of inertial navigation, georeferencing and stabilization systems and PV-Labs Ltd, a privately held company based in Canada and a leader in the design and manufacture gyro-stabilized gimbals and advanced ISR&T (Intelligence Surveillance Reconnaissance and Targeting) imaging systems, have announced today the signing of a binding agreement for CNS to purchase a 30% minority ownership in PV-Labs Ltd for 2.5 million USD. The agreement provides CNS with a call option to purchase the remaining 70% ownership which can be exercised in 5 years. The two companies will start to cooperate and strengthen their combined technological and product development knowhow. The transaction is expected to close within 90 days after approval of Investment Canada Act (“ICA”) application (equivalent of Italian “Golden Power”).

PV-Labs is a SME (Small and Medium-sized Enterprises) and was founded by Mark Chamberlain (former founder and CEO of WESCAM Inc, now L3Harris WESCAM) and has designed a unique line of Airborne ISR&T products, based on PV-Labs’ patented new stabilization technique for gimbals, called “Fifth-generation Advanced Stabilization Technology”, or “FAST” to address the growing demand for high performance ISR&T products worldwide, organically and by licensing to other ISR&T players to meet localization and other market needs.

Protected by an impenetrable moat made up of layers of value

Software

Proprietary software developed in-house, which translates algorithm into embedded code of the processor

Algorithm

An INS is formed by inertial sensor assembly and a complex navigation algorithm, which is developed by Civitanavi Systems' in-house team of PhD mathematicians and implemented into software and firmware designed according to safety-critical standards

IMU Calibration

Assembled inertial sensors are calibrated with a sophisticated algorithm and state-of-the-art motion simulators

Development & Assembly

Civitanavi Systems is the assembler and developer of the product with further improvement costs

Gyro Fiber Coils

The fiber coil is the heart of the gyroscope sensor and represents a technological advantage in the manufacturing process and scalability

Contract Manufacturing

Outsourcing of custom-made mechanical parts and electronics cards, all designed in-house. Outsourcing includes PCB (Printed Circuit Boards) and its surface mounting devices (SMD) assembly

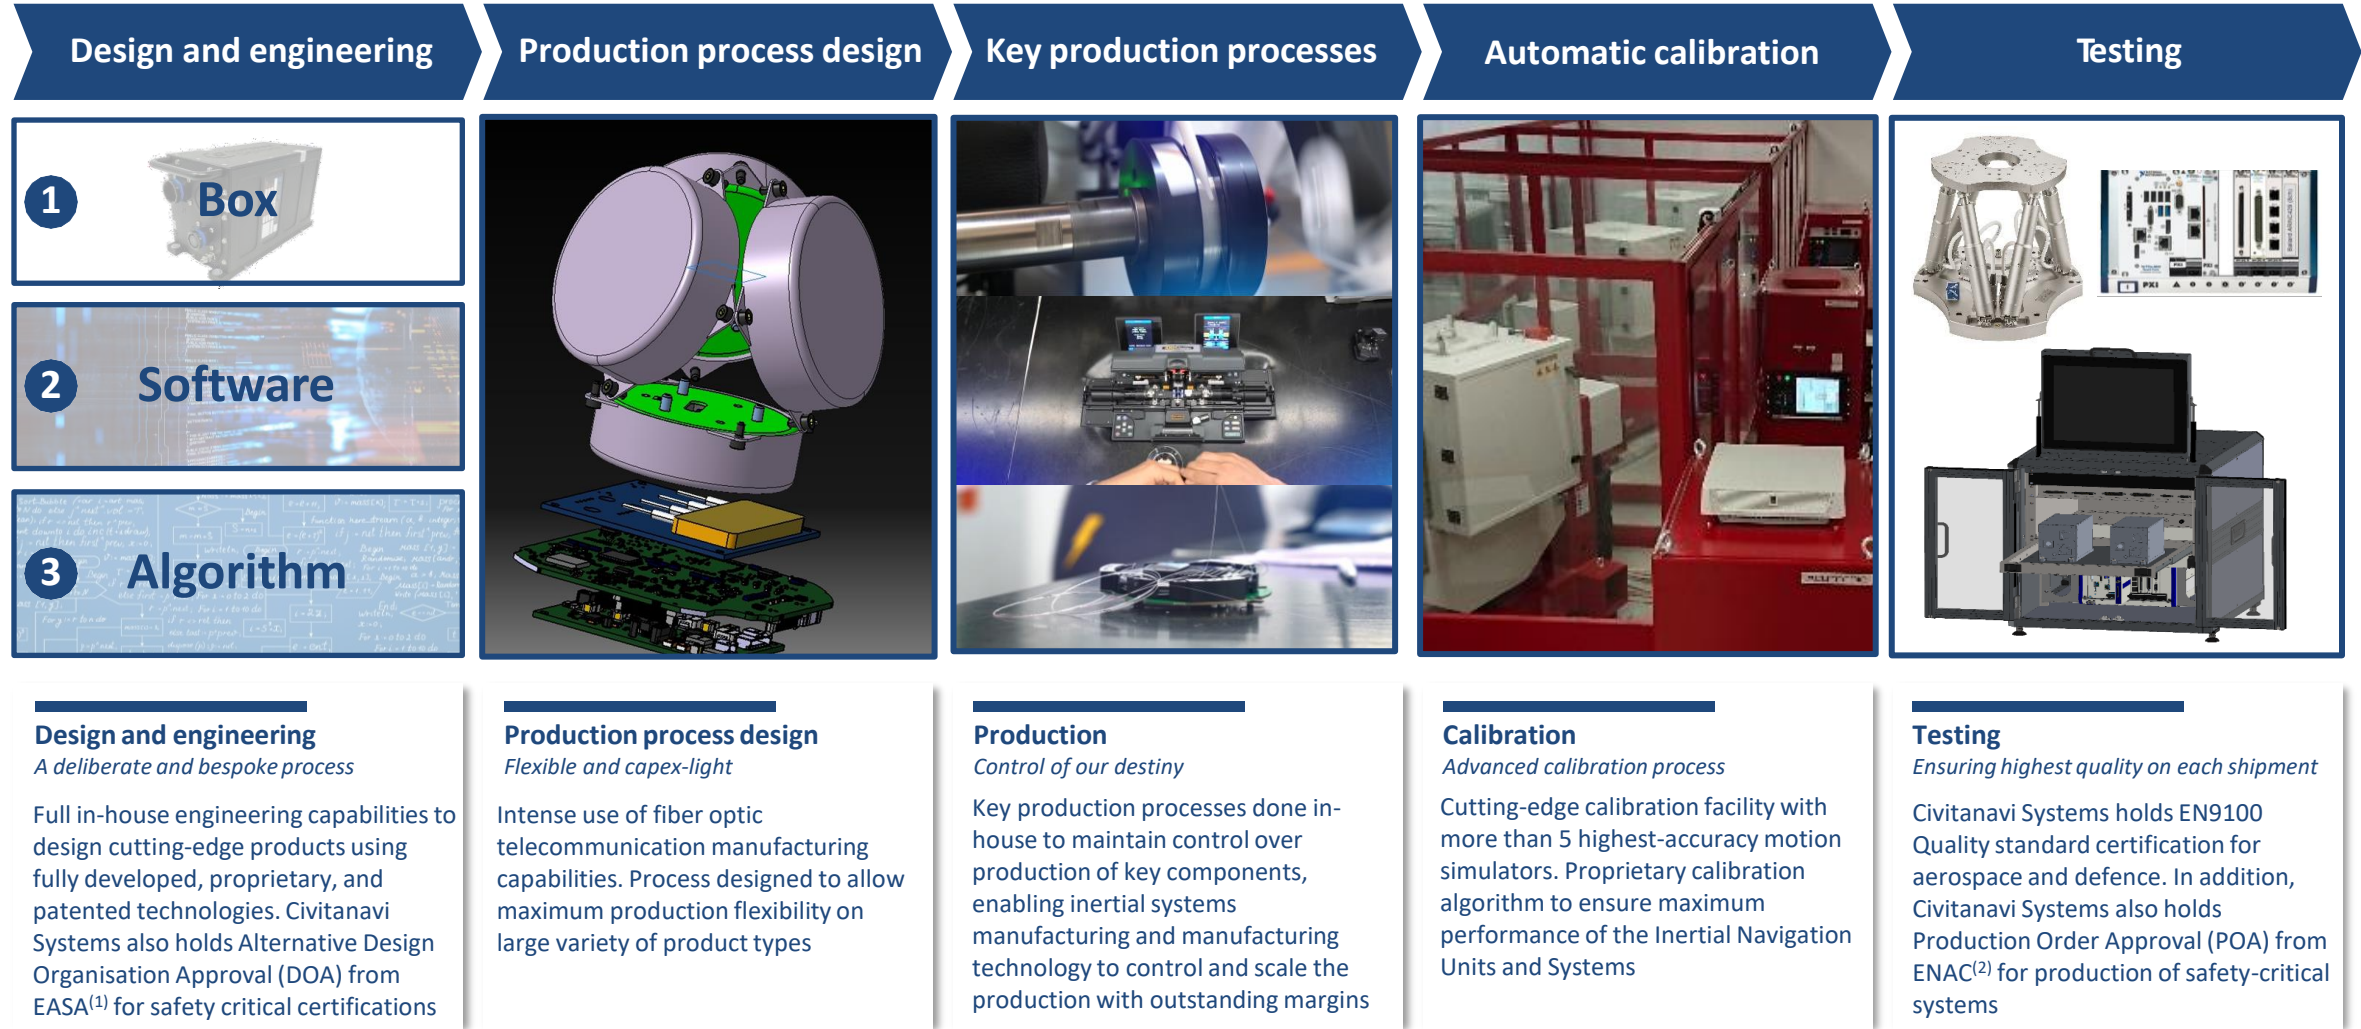

Industrial / Telecom / Automotive "COTS"

Most of the electronics and opto-electronics components used in the inertial systems are COTS (Commercially Available Off-the-Shelf) from large-scale industries like automotive, consumer electronics or telecom

1) EBITDA Adjusted is calculated as a profit or loss for the financial year/period, gross of income taxes, revenues and financial expenses, amortisation and depreciation, write-downs and write-downs of net financial assets, foreign currency gains or losses, the effects of non-recurring transactions and the effects of certain events and operations that the Management believes are not related to the Company's operational performance. It is consistent with the definition reported in the Prospectus during IPO.

Highly attractive margin profile (updated at June 2022)

EBITDA, EBITDA Adjusted and EBITDA margin
(€m)

Key Comments

- **EBITDA margin adjusted 1H2022 shows a strong increase** from 1H2021 confirming the 2022 guidance in terms of marginality.
- The excellent result achieved in the first half of 2022 is supported by the significant increase in business volume and at the same time by the ability of the Company to optimize the cost structure.
- The guidance in terms of margin is to achieve a margin equal or higher than the expected margin of 2021 (equal to 31%).
- No recurring costs are related to:
 - 1H2022: 653K€ of which relating to part of the costs incurred for the listing on the Euronext Milan market for Eur 628K€ and 25K€ other residual costs;
 - 1H2021, the Company did not have non-recurring items;

Solid balance sheet and strong cash generation (updated at June 2022)

Net Financial Position (€m)

CAPEX (€m)

Net Trade Working Capital (€m)

Key Comments

- **Strong liquidity position** thanks to cash generation of the period and capital injection. The Free cash flow of 1H2022 is +27,6M€ and the FCF net to IPO cash collected, is +6,3M€ compared to +1,9M€ of 1H2022;
- **Capex:** *Tangible fixed assets* for 1H2022 amounting to 1M€, mainly related to the purchase of machinery for production and instruments for expanding the production area. Such investments aimed at increasing the Company's production capacity. *Intangible assets*, amounting to 0,8M€, are mainly related to the development internal activities;
- **NTWC** of 1H2022 has generated cash for +5,2M€ mainly related to (i) decrease of trade receivables [it usually increases at year end due to the growth of deliveries and it normalizes in the interim period] (ii) the decrease of the Assets for work in progress on order net to advance payments (iii) the increase in warehouse inventories attributable to the increase in stocks to deal with production needs;
